

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) The combination of:

(a) a faceplate, said faceplate being sized and shaped to at least partially cover an electrical receptacle having one or more outlets; and

(b) a storage device coupled to said faceplate, said storage device being sized and shaped to retain a portable electric appliance, said storage device comprising a pocket-shaped holder which includes a front panel, a rear panel, a pair of side panels and a bottom panel that together define an interior cavity, at least one of said panels being shaped to include an opening in communication with the interior cavity.

2-19. Cancelled.

20. (Currently Amended) The combination of:

(a) a faceplate, said faceplate being sized and shaped to at least partially cover an electrical receptacle having one or more outlets; and

(b) a storage device coupled to said faceplate, said storage device being sized and shaped adapted to retain a portable electric appliance, said storage device comprising a front panel, a rear panel, a pair of side panels and a bottom panel which together partially define an interior cavity, the bottom panel of said storage device being shaped to include an opening in communication with the interior cavity.

21. (Currently Amended) The combination of:

(a) a faceplate, said faceplate being sized and shaped to at least partially cover an electrical receptacle having one or more outlets, said faceplate including a first fastening device, said first fastening device being in the form of a bracket that is shaped to define a slot; and

(b) a storage device coupled to said faceplate, said storage device being sized and shaped adapted to retain a portable electric appliance, said storage device comprising a front panel, a rear panel, a pair of side panels and a bottom panel which together partially define an interior cavity, at least one of said panels being shaped to include an opening in communication with the interior cavity, said storage device including a second at least one fastening device, said second fastening device being in the form of a hook,

(c) wherein the second fastening device which is adapted to sized and shaped to fittingly protrude into the slot and releasably engage the first fastening device on said faceplate.

22. (Currently Amended) The combination of:

(a) a faceplate, said faceplate being sized and shaped to at least partially cover an electrical receptacle having one or more outlets, ~~said faceplate including a fastening device~~, said faceplate including,

(i) a cover, said cover comprising a substantially flat front surface, and

(ii) a flange, said cover and said flange being ~~which are~~ integrally formed together; said flange extending generally orthogonally out from the flat front surface of the cover, and

(iii) a first fastening device formed on the flange; and

(b) a storage device coupled to said faceplate, said storage device being adapted to retain a portable electric appliance, said storage device including a second fastening device which is sized and shaped to releasably engage the first fastening device.
